## *Sections and Chapters*

To provide for greater and more frequent interaction, the Association members have formed local member units called Sections and Chapters. Participation at this level affords the members opportunities to meet in smaller groups to address issues of regional or local interest. Each offers its own services and benefits to members some of which may include:

- Sharing technical and managerial information with local colleagues
- Discounts on Section/Chapter activities
- Newsletters

Sections and Chapters are arranged by geographic boundaries. The map is meant to assist you in locating the appropriate Section/Chapter for your area.
