Young Professional Advisory Council: Council Member (2021 – Present); Vitality Committee Co-Chair (2021 – Present)

Awards: 2021 Outstanding Young Professional Award

Goals/Vision for the Organization

My vision for the Air & Waste Management Association (A&WMA) is to foster a more diverse and inclusive community within the organization. I believe that by embracing diversity and promoting representation, we can bring together a wider range of perspectives, experiences, and expertise to address the complex environmental challenges we face. By actively engaging individuals from different backgrounds, cultures, and disciplines, we can create a more comprehensive and effective approach to environmental management.

As a young professional, I would bring a fresh perspective to the board of the A&WMA, contributing to its continued growth and strength. Having worked with young professionals in my section and as part of the Young Professionals Advisory Council, I understand the unique challenges and opportunities that this demographic faces in the industry. This insight would allow me to advocate for their needs and aspirations, ensuring their voices are heard and their interests are represented.

Additionally, I envision the Air & Waste Management Association maintaining its position as the premier environmental organization by continuously adapting to the evolving needs of our field. Through innovative research, education, and collaboration, we can remain at the forefront of environmental advancements and continue to provide valuable resources and solutions to our members and the wider community.
